| Course Lengths and Standard Timescales | Start dates will be notified to students via their offer letter. The length and mode of delivery of the course is confirmed below:  
• 1 year full-time  
• 2 years part-time |
| Part Time Study             | Part-time delivery is usually at half the intensity of the full-time equivalent course. Some modules may be delivered in a different sequence from that defined in this summary. |
| Location of Delivery        | City Campus, Leeds, plus the location of work placement.                          |
| Entry Requirements          | Admissions criteria are confirmed in your offer letter. Details of how the University recognises prior learning and supports credit transfer are located here: www.leedsbeckett.ac.uk/studenthub/recognition-of-prior-learning.  
Admissions enquiries may be directed to:  
AdmissionsEnquiries@leedsbeckett.ac.uk. |
| Course Fees                 | Course fees and any additional course costs are confirmed in your offer letter. Fees enquiries may be directed to Fees@leedsbeckett.ac.uk. |
Timetable Information
Timetables will be made available to students during induction week via:

i) The Student Outlook Calendar
ii) The Student Portal (MyBeckett)
iii) The Leeds Beckett app

Any difficulties relating to timetabled sessions may be discussed with your Course Administrator.

Policies, Standards and Regulations  www.leedsbeckett.ac.uk/public-information
The course follows the Regulations except where noted below. This course is subject to the Fitness to Practise Policy & Procedure. http://www.leedsbeckett.ac.uk/public-information/student-regulations/

Recognition of Prior Learning: Students with the Community Practitioner Nurse Prescribing V150 NMC qualification or with the V300 Nurse independent/supplementary prescriber NMC qualification (named Non-Medical Prescribing at Leeds Beckett) can apply for and claim RPL for part of the Professional Development in Practice module and can be exempt from the prescribing assessment in this module (V100) if they show evidence of their NMC prescribing qualification and their continued use and CPD in prescribing.

Requests for credit transfer (RPL): In order to comply with Nursing and Midwifery Council standards (NMC, 2004), credit transfer can only be for a maximum of one third of the course.

All assessments to be passed and pass/fail assessments
- All components of assessments must be passed at 40% or a pass for pass/fail marking to pass a module.
- All components of assessment and all modules must be passed to achieve the award.

Prescribing exam, Professional Development in Practice module
- For the Prescribing exam, students must pass all numeracy questions (100% pass mark), plus 80% pass mark overall, with a final mark of pass/fail.
- For the Prescribing exam, students are given 2 opportunities for re-assessment for this component only in view of the pass mark required.
- For students required to repeat the module after failing 3 times the Prescribing exam component only, student are only required to repeat this component and are not required to repeat any other component.

Mid-point assessment for practice: There is a summative assessment of practice midway through the course (in module, Professional Development in Practice). The student’s Practice Teacher in practice is responsible for assessing this and signs the Confirmation of Student Progression (at the end of semester 1 for full time students or at the end of semester 2 for part time students). If a student does not pass the mid-point assessment in practice and then fails to meet the requirements set in order to retrieve this failed assessment, this will be reported to the Board of Examiners prior to the student attempting to complete the level. This may mean that the student cannot repeat the practice placement if a new placement cannot be secured. The student would then receive a ‘withdraw’ not ‘repeat’ decision.

Contained award: Students are eligible for the contained award PG Cert Health Related Studies for the attainment of a minimum of 60 credits at L7 from any of the modules of the target award. If the module has
a pass/fail assessment, this will need to be passed, in order to evidence that the student has achieved the required profile for the award.

**Achievement of credit:** The Professional Development in Practice module is linked to the NMC placement requirements of the course (minimum 112.5 days) which includes 15 days alternative placement and 50 days consolidation of practice. This practice time also includes supervision for integrated nurse prescribing. The practice requirement is calculated to be 844 hours of work based learning (practice hours), which have been added to the Learning and Teaching activities. This 20 credit module’s 200 notional hours have therefore been exceeded and total 888 hours.

**Attendance monitoring:** Students need to meet and evidence meeting NMC requirements for practice and learning. Attendance monitoring is a requirement of the NMC or employers funding the course. Attendance is expected in both University and in the practice environment. Details of these expectations are provided in the Course Handbook and the student year planner. The year planner demonstrates the NMC standard for approved courses maintaining a 50% theory and 50% practice split of student time. Course Leaders will act if they detect any issues relating to attendance requirements not meeting the NMC standards. This may be in the form of support from Services for Students, or where appropriate, using the fitness to practise process. In either case, the University is obliged to communicate with employers regarding student attendance.

**Your Key Contacts**

**Course Director:** Paul Mackreth, p.mackreth@leedsbeckett.ac.uk

**Course Leader:** Dawn Taylor, d.taylor@leedsbeckett.ac.uk

**Academic Adviser:** Dawn Taylor, d.taylor@leedsbeckett.ac.uk

**Course Administrator:** Sarah Holstead, s.holstead@leedsbeckett.ac.uk

**Work Placement Information**

**Summary:** This course is delivered in collaboration with healthcare employers, usually the NHS. As an NMC approved course, 50% of time is spent in the practice placement, in order to bridge the theory/practice gap and to allow for experiential learning. As a postgraduate, students take the lead in their own learning. The e-portfolio facilitates this process acting as a guide to developing action plans and in self-assessment tasks. The outcome is that all students must evidence, through practice, the meeting of the NMC standards. Each module assessment also is rooted in practice learning and is based upon a work-based project. It is a requirement that all students are **supernumerary** to the staff establishment for practice-based learning.

**Length:** The overall course is 52 weeks (pro-rata), and of this 45 weeks are programmed, with the remaining 7 weeks taken as leave. These are clearly detailed on the annual course calendar that is provided prior to the commencement of each course. To maintain the theory/practice 50% ratio, the expectation is that full-time students allocate their time as:

- Two days per week in practice placement when they also have two days a week in University.
- Spend up to 15 days in ‘alternative practice’.
- Complete a ten week ‘consolidation of practice’ placement at the end of the course.

Part-time students complete the above pro-rata.

**Location:** Placements are provided by the student’s employer.
Professional Accreditation or Recognition Associated with the Course

Professional Body: Nursing & Midwifery Council

Accreditation/Recognition Summary: Graduates will be eligible to register as a Specialist Community Public Health Nurse annotated with the specialist field of Health Visiting.

Course Overview

Aims
This Specialist Community Public Health Nursing course enables registered nurses and midwives to obtain a specialist additional postgraduate award and, through completing a specified period of practice, to qualify for entry onto the third part of the nursing register for Specialist Community Public Health Nursing (SCPHN) and gain employment as a Specialist Practitioner within Health Visiting. The course will enable achievement of standards of proficiency sufficient for safe and effective practice for entry to register as a Specialist Community Public Health Nurse annotated with the specialist field of Health Visiting (NMC, 2004). The framework for competency adheres to the ten key principal standards of Proficiency for Public Health (NMC 2004) which are grouped into four domains: search for health needs; stimulation of awareness of health needs; influence on policies affecting health; and facilitation of health enhancing activities.

The curriculum will enable the SCPHN, upon registration, to work collaboratively on behalf of their communities, to empower the population when making decisions and actions affecting their health, adhering to the standards of proficiency as set by the NMC (2004). Common core modules, shared across the specialisms, will enable students to acquire greater understanding of each other’s roles, shared challenges and opportunities to identify and respond to health needs collaboratively. The inter-professional debate, facilitated through a variety of activities will provide greater perception of the value of colleagues and promote partnership working in practice. Specifically the inter-professional (Nursing) delivery structure of the course facilitates different nursing practitioners to work together, the Inter-professional learning (IPL) Strategy and the IPL conferences are a key part of this and lead to a strong course identity for Specialist Community Public Health Nurses.

The course will prepare the practitioner to build on alliances with individuals, families, communities, national and local governments, education, business and industry, voluntary, faith and charitable organisations to improve the health of the people. This will enable the Specialist Community Public Health Nurse to work collaboratively on behalf of their communities, to empower the population when making decisions and actions affecting their health. The specialist modules for Health Visiting will enable students to make a valuable contribution to improving the health and wellbeing of younger children and their families; Health Visitors will lead and deliver responsive preventative programmes that improve health outcomes and tackle health inequalities.
Course Learning Outcomes
On completion of the course, successful students are able to:
• Demonstrate a critical understanding and application of skills, knowledge and abilities to make a valuable contribution to improving the health and wellbeing of young (birth-5 years) children and families.
• Lead, manage, inform and influence services and service improvement that is underpinned by a critical understanding of theory and reflexive recognition of the policies and organisational context of delivering a range of primary and community Health Visiting services.
• Critically evaluate the breadth and depth of the Specialist Health Visitor role and examine the scope for innovative care, safely and effectively in practice within the context of the specialist community practice that shows originality in the application of knowledge.
• Achieve the proficiencies/standards required by the NMC to register as a Specialist Community Public Health Nurse Health Visitor and to synthesise new knowledge into practice.
• Be able to deal with complex issues systematically and creatively to make sound and safe decisions.
• Demonstrate initiative, personal responsibility and an advanced level of professional accountability.

Teaching and Learning Activities

Summary
Mid-career study is an opportunity to stand back and reflect upon approaches to nursing practice. To facilitate the transition between busy day to day nursing practice and formal postgraduate study a one week induction programme is offered. This assists in the orientation of online systems and the campus, allows time for the student registration process, provides opportunities to create and form groups and is the commencement of course, professional and University relationships.

Experiential learning in developing specialist practice
Assessment, learning and teaching activities embrace a student-centred philosophy and are designed around the principles of progressive lifelong learning and the development of postgraduate skills. Students enter their course as experienced ‘expert’ nurses and then become ‘novices’ in their journey in meeting their new standards for specialist nursing practice (Benner 1982; NMC, 2004). They form a strong professional and course identity in working as a peer group in class-based and work-based tasks. This process is facilitated by a course leader/personal tutor who is a specialist in the field of practice, together with a qualified practice-based Practice Teacher. One of the first tasks students and the course team undertake is the formation of the tripartite relationship between these three agencies. This supports the one to one recognition of a student’s individual learning needs together with their learning strengths. The tripartite relationship is supported by the e-portfolio which provides a means by which students can share and develop their reflective work with tutors and Practice Teachers.

Modular learning
Modular learning and assessment are rooted in work-based discussion and the development of work-based projects. These are designed to bridge the theory/practice gap. The course team divides modules between ‘core’ (that all community nursing students undertake) and ‘specialist’ (that specifically focus on one chosen field of practice), and there are no elective modules. Modular learning develops in-depth knowledge and an understanding of shared challenges in practice. This in turn leads to increased respect for the role of other health
and community care practitioners, working in diverse long term care and public health settings; promoting improved inter-professional co-operation.

Modules are purposely delivered to ensure that, by the end of the course, students produce for assessment a document that clearly evidences the meeting of NMC standards for specialist practice (2004,: the PebblePad e-portfolio. Each module challenges students to complete tasks and activities via lectures, seminars, simulated learning, and pre/post-classroom activities. The specific activities depend on modules undertaken, but artefacts and evidence from these sessions can be used in the e-portfolio. Throughout the course there is a focus on encouraging increasing independence and advancing academic skills, and the e-portfolio is central to this process as it allows for student self-assessment, planning of learning, the production of evidence to meet learning plans and ultimately their ability to confirm that they, under the supervision and assessment of a Practice Teacher, have met their own learning plans. At the end of the course, students are provided with ongoing alumni-access to their e-portfolio and its contents on a ‘free for life’ basis allowing them to continue to use it for ongoing Continuing Professional Development and to support NMC professional revalidation processes for nurses.

Your Modules
This information is correct for students progressing through the course within standard timescales. Students who are required to undertake repeat study may be taught alternate modules which meet the overall course learning outcomes. Details of module delivery will be provided in your timetable.

Level 7 Core Modules
Common Core Modules
- Building Community Capacity in Public Health
- Understanding Social Research and Evaluation
- Leadership, Management and Enterprise
- Therapeutic Relationships for Health Care Practitioners

Specialist Focus Health Visiting Modules
- Professional Development In Practice (including the prescribing component)
- Getting it right for Children and Families, birth to 5 years

Assessment Balance and Scheduled Learning and Teaching Activities
The assessment balance and overall workload associated with this course are calculated from core modules. A standard module equates to 200 notional learning hours, comprising teaching, learning and assessment, any embedded placement activities and independent study. Modules may have more than one component of assessment.

Assessment
On this course students are assessed through coursework, examinations, a portfolio for practice and practical skills assessments. Students are assessed in practice.
**Workload**
The notional hours have been exceeded due to the placement hours requirement.

**Learning Support**
If you have a question or a problem relating to your course, your Course Administrator is there to help you. Course Administrators work closely with academic staff and can make referrals to teaching staff or to specialist professional services as appropriate. They can give you a confirmation of attendance letter and a transcript. You may also like to contact your Course Rep or the Students’ Union Advice team for additional support with course-related questions.

If you have any questions about life at our University in general, call into or contact the Student Hub on either campus to speak to our Student Experience Team. This team, consisting of recent graduates and permanent staff, are available to support you throughout your time here. They will make sure you have access to and are aware of the support, specialist services and opportunities our University provides. There is a Student Hub on the ground floor of the Rose Bowl at City Campus and one in Campus Central at Headingley. You can also find the team in the Gateway in the Leslie Silver Building at City Campus. Email enquiries may be directed to studentexperience@leedsbeckett.ac.uk.

Within MyBeckett you will see two tabs (Support and Opportunities) where you can find online information and resources for yourselves. The Support tab gives you access to details of services available to give you academic and personal support. These include Library Services, the Students’ Union, Money advice, Disability advice and support, Wellbeing, International Student Services and Accommodation. There is also an A-Z of Support Services, and access to online appointments/registration.

The Opportunities tab is the place to explore the options you have for jobs, work placements, volunteering, and a wide range of other opportunities. For example, you can find out here how to get help with your CV, prepare for an interview, get a part-time job or voluntary role, take part in an international project, or join societies closer to home.
